July 2008

**PRESS RELEASE**

**Submec Offshore turns to Perry Slingsby Systems**

**Third contract win for PSS in as many weeks**

Submec Offshore has awarded leading supplier of remote intervention technologies and equipment Perry Slingsby Systems (PSS) a contract to supply Triton® XLX 33 and 34 ROV systems.

The deal caps a successful month which has seen the Florida - based company land a string of contracts worth in excess of \$17 million.

The two 3,000 meter rated systems include the latest in tooling and survey capabilities while featuring the PSS ICE® (Integrated Controls Engine) real time control system with state-of-the-art Gb telemetry and graphical diagnostics.

Submec Offshore is a growth company based in Perth, Australia. It specializes in project support, operations and engineering with a focus on the Australia and SE Asia markets. The TXLX systems will be employed on various deepwater construction projects following their delivery in November 2008

PSSI Vice President – Sales John Rhodes said: “This latest deal is the culmination of a hugely successful month for PSS. We’re excited that Submec Offshore has selected PSS as their strategic supplier. Our ability to deliver quality, reliable and well supported products gives Submec Offshore an outstanding base on which to further grow their business.”

**PSS is a member of Triton Group Holdings (TGH), which is an international group of businesses, offering a range of control system based products and systems with complimentary services. Products include the widest range of market leading electric and hydraulic ROVs for inspection, s**For more information, please contact:
